

QUANTUM OPTIMIST SAILS

ARE YOU READY
FOR WHAT'S
NEXT?

THE ULTRAFAST QUANTUM XR-1

When it's time to accelerate your program you want the best - the Quantum XR-1. This fast Opti Sail features the latest sail materials and technology including the finest sailcloth with superior stretch resistance and an innovative design with more volume at the top for faster sailing.

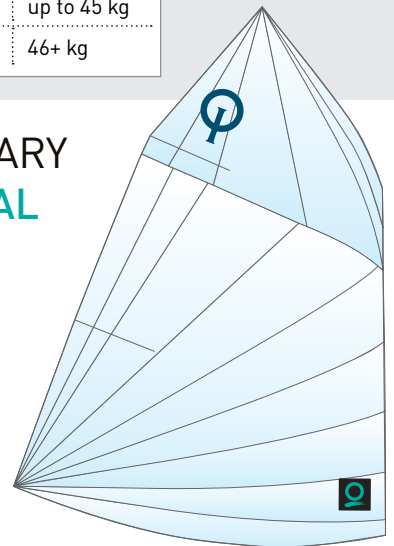

- High-quality sailcloth with superior stretch resistance, strength, and durability
- More volume at the top for faster sailing, especially downwind
- Light weight reinforcements for less overall weight, and better performance
- Cross-cut panels combine with a radial top resulting in more camber without closing the leech
- Light weight foot and head tapes with more flexibility

Two models based on skipper's weight:

Green	Up to 99 lbs	up to 45 kg
Black	100+ lbs	46+ kg

THE EVOLUTIONARY QUANTUM RADIAL

Nothing works better than a classic unless it's Quantum's Radial Opti sail. With a stable form, very low stretch, and minimal distortion, the Opti Radial offers top-level performance. Sail panels are cut with threads facing the stress direction for greatest strength.

- Highly stable form yields excellent performance even in strong winds
- Minimal stretch in the cloth means less distortion, better shape-holding ability
- Less distortion extends the competitive life of the sail

Three models based on skipper's weight:

NEW Blue	Up to 80 lbs	42 kg
Green	80-95 lbs	42-43 kg
Black	95+ lbs	43+ kg

All sails come complete with battens, vision window, luff & leech tell-tales, IODA royalty button, tube bag, sail ties and sail numbers (digital eights for customer installation). Factory-installed numbers are available for an additional fee.

Optimist sails are available through a Quantum® Sail Loft near you.

Visit our website for a directory of locations.
